

8 October 2015

Good afternoon,

Re: Changes within Clarence Consultants

Clarence Consultants was established in 1996 to service the electricity distribution sectors then new contestable works market. As the practice grew electrical and mechanical building services were added to our capability. Matt Karpik joined the practice in 2005 as our Senior Mechanical Engineer and in 2008 became a shareholder in the practice.

Matt has progressively moved into the general management role over the last 4 years with the intention of ultimately taking full ownership of the practice.

The time has come for me to step aside and for Matt and his team to take the practice into the future and it is with great pleasure that I announce that as of 1st October 2015 Matt stepped into the role of sole director of Clarence Consultants.

I will continue with Clarence Consultants until the end of the year supporting Matt and his team in the transition.

Our senior engineers and project engineers will continue to manage individual projects with my support behind the scene. All project enquiries and processes are to be directed to the project manager currently looking after your project.

Matt and his team look forward to continuing to work with you on existing and future engineering projects.

If you have any queries our concerns regarding the above, please do not hesitate to contact Matt on 02 66524855 or matt@clarenceconsultants.com.au

Yours sincerely

Michael Brennan
